BitbyBit Submission Form | TrustFlow AI

127.0.0.1:3000/index.html

PLATFORM

Built for real freelancers, real employers, real money.

Every major touchpoint gets its own trust layer: brief structuring, reputation, identity, milestone proof, release automation, and project room visibility.

AI

AI milestone planning

Convert vague scopes into staged deliverables, deadlines, and payout logic in seconds.

EV

Evidence-driven verification

Uploaded work, code diffs, walkthroughs, and approvals are reviewed against the agreed scope.

ES

Smart escrow routing

Funds stay protected until the right milestone checks pass, then release automatically.

ID

Identity assurance

Video verification and liveness signals make remote collaboration feel less anonymous.

TS

Trust scoring

Capability, delivery history, responsiveness, and proof quality contribute to a usable score.

RM

Room-level transparency

Project rooms centralize timelines, assets, approvals, and discussion into one premium view.

WORKFLOW

BitbyBit Submission Form | TrustFlow AI

127.0.0.1:3000/index.html

WORKFLOW

From handshake to payout, every step is calm.

01

Post the brief

Describe your project once and let TrustFlow turn it into structure.

02

Fund the escrow

Protect the working relationship before delivery ever begins.

03

Verify the work

Attach proof, review against milestones, and keep acceptance explicit.

04

Release instantly

Approved funds move without awkward follow-ups or payment uncertainty.

EARLY ACCESS

Experience Next-Level Trust.

Join the premium beta for employers, agencies, and solo operators who want cleaner freelance execution.

TESTIMONIALS

Real Voices, Real Trust

Endorsed by freelancers and employers alike.

TrustFlow AI made project delivery seamless and secure.

Roopa K. · Agency founder

Finally, a platform where I get paid fairly and on time.

Daniel R. · Product designer

Milestones are clear, and payments are instant after verification.

Sara M. · Startup operator

TrustFlow AI ended payment anxiety for my freelance work.

Aryan P. · Frontend engineer

☀ Light / 🌙 Dark | 🔔 Notifications 4

AI SKILL VALIDATION

Test the skill before the freelancer gets the project.

For coding, design, or strategy work, TrustFlow can issue a quick AI micro-test. Passing it earns a verified skill badge and improves payout confidence inside the Trust Wallet.

Current project type
Frontend development
Three fast questions focused on UI reliability and implementation judgment.

Badge status
Pending
Run the micro-test to award a verified skill badge.

Micro-tests issued	Verification rate	Skill score	PFI uplift
124	0%	--	+0
Used before project acceptance to reduce skill mismatch.	Updates once the candidate completes the challenge set.	Weighted from correctness, clarity, and project-fit.	Passing the test improves the Professional Fidelity Index.

AI detected uncertainty in project commitment.01:22

Why This Sells in the Demo

The judges can see the AI intermediary acting as a neutral trust bridge.

- ✓ Both employer and freelancer are visible in the same live call surface.
- ✓ Behavioral analysis is tied to escrow action instead of staying ornamental.
- ✓ The result flows into the wallet and PFI so the system feels connected.
- ✓ The same data can be shown as a polished demo or extended into a real workflow.

The call screen keeps both sides visible while the AI intermediary updates escrow action, trust score, and PFI live.
